CharIN Official Statement for comemso electronics GmbH as a CharIN CCTS (Charging Conformance Test System) Vendor

Berlin, 17.12.2025

This document confirms that **comemso electronics GmbH** is officially recognized by **CharIN** as a **validated Conformance Test System (CCTS) vendor** for the **Charging System Basic and Extended application profile**, in accordance with the **CharIN CCTS Specification** and the **CharIN Umbrella Document for Charging System Basic DC EVSE** and **CharIN Umbrella Document for Charging System Extended DC EVSE**.

Comemso electronics GmbH, together with all CharIN validated CCTS vendors, has successfully completed a **comprehensive validation process** covering both system performance and test case implementation. Comemso electronics GmbH has demonstrated its ability to provide **reliable and repeatable testing and measurements** for CharIN Conformance Testing within the respective Charging System application profile.

The inclusion of comemso electronics GmbH in the CharIN validated CCTS ecosystem highlights its **commitment to interoperability** and to **enhancing the overall EV charging experience** for users. CharIN validated CCTS can be used for both **official CharIN Charging System Conformance Testing** and **individual product development activities**.

In collaboration with **CharIN-recognized testing laboratories**, manufacturers of charging stations and electric vehicles can test their products against the relevant CharIN Charging System application profile. Products that successfully complete the CharIN Conformance Testing using a CharIN validated CCTS and receive the "**CharIN Conformance Approved**" designation represent a **significant advancement in quality, interoperability, and user experience**.

The Focus Group Conformance Test & Interoperability is the responsible CharIN working group that maintains the processes supporting this system. For reference, comemso electronics GmbH is officially listed on the CharIN website as a validated vendor for the Charging System Basic and Extended application profile: <https://www.charin.global/technology/charin-conformance-testing/>

Best regards,

Michael Keller
CTO CharIN e.V.
